

# System Administration using BuyDesign InTouch

---

The BuyDesign InTouch Server is a central communications gateway for BuyDesign clients. To fully realize the power and versatility of this product, TDCI offers this course in the use of InTouch Server.

## Purpose

This course teaches you to install, configure, set-up and maintain your InTouch server.

## Audience

Customer Support personnel and Systems Administrators

## Prerequisites

A general knowledge of BuyDesign Suite applications is necessary for this class.

## Details

The course is three days, Instructor-led, and offered at TDCI or at a customer-provided training site. Training is specific to the current released version of BuyDesign.

## Topics

This course covers the following topics:

- Installation and Configuration
- Publishing Data and Content
- Managing Customers
- Managing Licenses
- Creating, Installing and Publishing Client Packages and Updates
- Troubleshooting
